

From the other side of chaos... is a deep dive into the space between music, movement, materials and spoken word. It's an exploration of the world that is created when all these mediums meet on an equal playing field, and clash and coalesce into something entirely different and unexpected. The work is driven by no one artistic medium or narrative but seeks to discover a new common language out of the 'chaos' of improvisational experimentation. Through tearing apart our expectations of artistic mediums, it searches for what brings us together, both as artists and as people.

FROM THE OTHER SIDE OF CHAOS ...
